ANNEX A ABSTRACT TEST SUITE 13

ABSTRACT

This document defines the Minimal EDR Profile Example, an OGC API — Environmental Data Retrieval (EDR) Part 3 Service Profile. It specifies normative requirements and conformance tests for server implementations conforming to this profile.

PREFACE

This document was prepared by the submitting organizations.

III SECURITY CONSIDERATIONS

No security considerations have been made for this document.

IV SUBMITTERS

All questions regarding this document should be directed to the editor or the submitters:

1 SCOPE

1 SCOPE

This standard defines the Minimal EDR Profile Example. It specifies requirements and conformance tests for implementations of this profile.

2

CONFORMANCE

2 CONFORMANCE

Conformance with this standard shall be checked using the Abstract Test Suite in Annex A.

The following conformance classes are defined:

- http://www.opengis.net/spec/ogcapi-edr-3/1.0/conf/minimal_profile

3

NORMATIVE REFERENCES

3 NORMATIVE REFERENCES

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

OGC API — EDR Part 3: Service Profiles (draft)

4 TERMS AND DEFINITIONS

4 TERMS AND DEFINITIONS

No terms and definitions are listed in this document.

This document uses the terms defined in OGC Policy Directive 49, which is based on the ISO/IEC Directives, Part 2, Rules for the structure and drafting of International Standards. In particular, the word “shall” (not “must”) is the verb form used to indicate a requirement to be strictly followed to conform to this standard.

This document also uses terms defined in OGC API — EDR Part 1: Core.

5

REQUIREMENTS

5 REQUIREMENTS

NOTE: Conformance with this profile is assessed against its requirements ("shall") only. Recommendations ("should") and permissions ("may") are provided as informative guidance: they are not conformance-tested and an implementation is not made non-conformant by not following them. See the quality-assessment summary emitted by the profile tooling for a count of the recommendations and permissions defined by this profile.

REQUIREMENTS CLASS 1	
IDENTIFIER	`http://www.opengis.net/spec/ogcapi-edr-3/1.0/req/minimal_profile`
CONFORMANCE CLASS	Conformance class A.1: `http://www.opengis.net/spec/ogcapi-edr-3/1.0/conf/minimal_profile`
TARGET-TYPE	Minimal EDR Profile Example Profile Standard
NORMATIVE STATEMENTS	Permission 1: `/req/minimal_profile/temperature-post-query` Recommendation 1: `/req/minimal_profile/temperature-units-label` Requirement 1: `/req/minimal_profile/temperature-geojson`

REQUIREMENT 1	
IDENTIFIER	`/req/minimal_profile/temperature-geojson`
INCLUDED IN	Requirements class 1: `http://www.opengis.net/spec/ogcapi-edr-3/1.0/req/minimal_profile`
STATEMENT	The temperature collection SHALL return GeoJSON features.
A	The service SHALL provide a /collections/temperature/items endpoint.
B	The response Content-Type SHALL be application/geo+json.

RECOMMENDATION 1	
IDENTIFIER	`/req/minimal_profile/temperature-units-label`
INCLUDED IN	Requirements class 1: `http://www.opengis.net/spec/ogcapi-edr-3/1.0/req/minimal_profile`

RECOMMENDATION 1

STATEMENT	The temperature collection SHOULD label its unit as Celsius.
A	Each temp parameter SHOULD expose a unit.label of “Celsius”.

PERMISSION 1

IDENTIFIER	`/req/minimal_profile/temperature-post-query`
INCLUDED IN	Requirements class 1: `http://www.opengis.net/spec/ogcapi-edr-3/1.0/req/minimal_profile`
STATEMENT	The service MAY support POST queries for the temperature collection.
A	Implementations MAY offer POST alongside GET on data query endpoints.

A

ANNEX A (NORMATIVE) ABSTRACT TEST SUITE

ANNEX A (NORMATIVE) ABSTRACT TEST SUITE

CONFORMANCE CLASS A.1	
IDENTIFIER	`http://www.opengis.net/spec/ogcapi-edr-3/1.0/conf/minimal_profile`
REQUIREMENTS CLASS	Requirements class 1: `http://www.opengis.net/spec/ogcapi-edr-3/1.0/req/minimal_profile`
CONFORMANCE TEST	Abstract test A.1-1: `/conf/minimal_profile/temperature-geojson`

Example

label	/conf/minimal_profile/temperature-geojson
subject	/req/minimal_profile/temperature-geojson
test-purpose	Validate that temperature geojson is correctly implemented.

Send GET request to /collections/temperature/items.

Verify the response Content-Type is application/geo+json.

Verify each feature contains temp property.
